ARCHITECTURE PORTFOLIO

NIHARIKA PATIL

NIHARIKA PATIL

I am a fifth-year architecture student with a research-driven approach to design, deeply interested in cognitive neuroscience, human behaviour, and spatial perception. I explore how these shape human experience, translating research into intentional architectural decisions shaping form and movement.

EDUCATION

BMS COLLEGE OF ARCHITECTURE DESIGN AND PLANNING — B.Arch
Bengaluru,India
2022 - Present

CHRIST JUNIOR COLLEGE — State
Bengaluru,India — 86%
2019 - 2021

HEAD START EDUCATIONAL ACADEMY — ICSE
Bengaluru,India — 86%
2009 - 2019

SOFTWARE

Drafting and BIM
AutoCAD, Revit

3D modelling
Rhino, SketchUp, Grasshopper*(basic)*

Presentation
InDesign, Photoshop, Canva

Visualization
D5 render, Twinmotion

LANGUAGES

English, Hindi, Kannada

PARTICIPATION

Buildner Unbuilt Competition - 2025
Participated

Melukote 2040: A collective vision for a living sacred town
Stakeholder Interaction

Nippon AYDA awards - 2026
Participated

DOCUMENTATION

Melukote Documentation
Mandya, Karnataka

PUBLICATIONS

Saanidhya - Melukote Documentation
Documentation and Editorial team

SKILLS

Research & Conceptual Design
Cognitive Research, Behavioural Mapping, Spatial Translation

Sketching
Pencil, Digital, Conceptual diagrams

Painting
Acrylic, Watercolour

Physical Modelling
Product prototyping, Material and Form Exploration

INTERESTS

Football, Guitar, Debates, Research papers

01

EXOSKELETAL CIRCUIT

The project explores the design of a 40,000-seat football stadium in Bengaluru, reimagining circulation through an exposed exoskeletal system. Instead of enclosing movement behind a continuous façade, circulation towers open to the surroundings define the stadium’s architectural identity, complemented by organic forms inspired by crowd movement.

LOCATION	Bengaluru	AREA	36 acres
TYPOLOGY	Stadium Design	SEMESTER	Semester 7

MASTERPLAN-GROUND FLOOR

Adjacent to Cubbon Park, the proposal reimagines the Kanteerava Stadium site as a year-round public destination, active beyond sporting events.

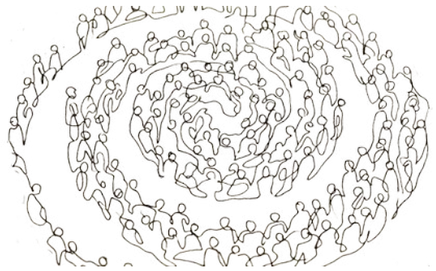
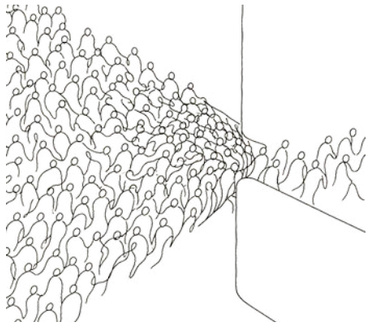
CONCEPT

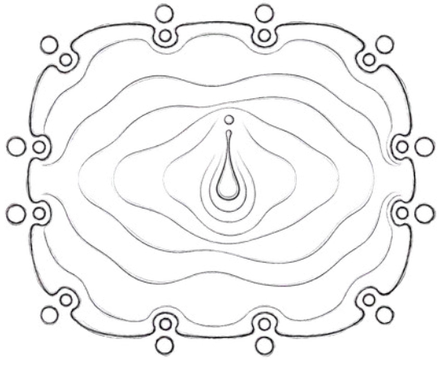
At high densities, crowds behave like fluids, flowing, accumulating, and responding collectively to disturbances.



Propagation from point of disturbance

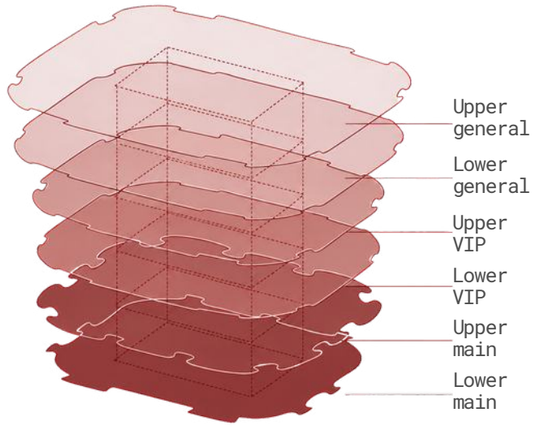


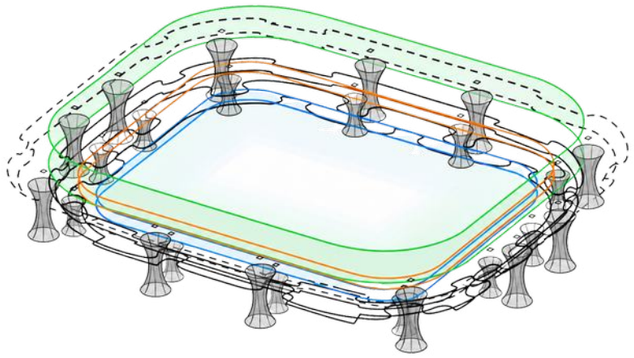
Accumulation at Point of Obstruction



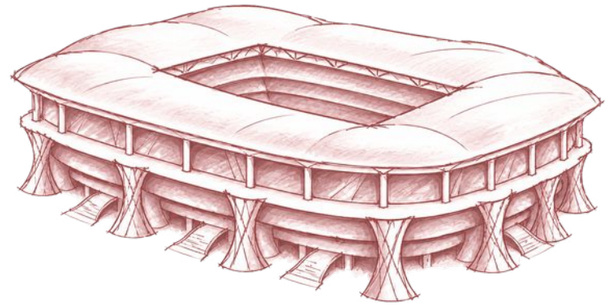
Fluid Behaviour to Form

FORM DEVELOPMENT

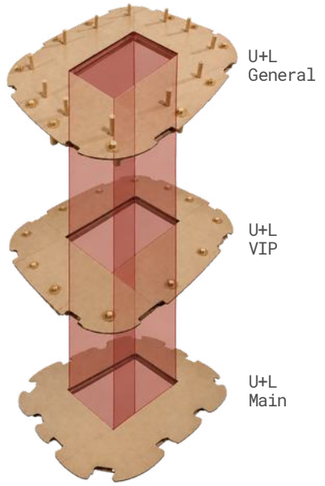




[Conceptual sketch of overall massing]



[Digital sketch of envisioned form]



[Hand-done 3d massing of levels]

02

SAMVEDANA

Located on the highly contoured Karnataka Chitrakala Parishath site in Bengaluru, Samvedana is an arts institute for the visually impaired, integrating performing and visual arts. The design responds to the terrain through interconnected levels, sensory cues, and spatial transitions that encourage independent navigation.

LOCATION	Bengaluru	AREA	3.4 acres
TYPOLOGY	Institutional Design	SEMESTER	Semester 6

MITTI

Located in Bengaluru’s Pottery Town, Mitti aims to preserve the art of pottery while sustaining the livelihoods of local artisans. The centre provides dedicated spaces for production, display, and year-round sale, creating a shared environment where artisans and visitors can interact, learn, and support the craft.

LOCATION	Bengaluru	AREA	2.08 acres

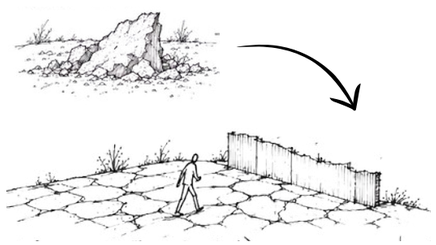
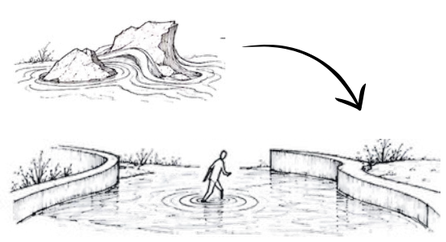
CONCEPTUAL EVOLUTION

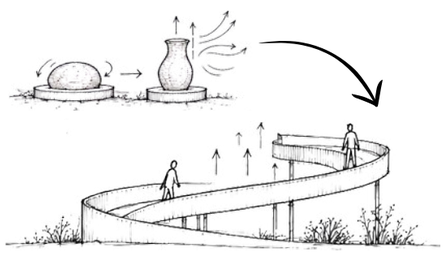
Architectural translation of the 5 elements of nature + 5 stages of pottery



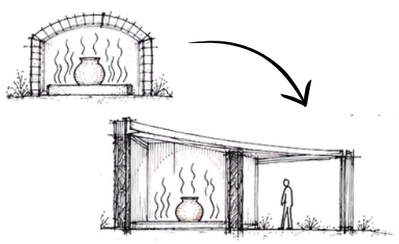
01 [**Earth**] + [Raw material of pottery] → Textured clay flooring



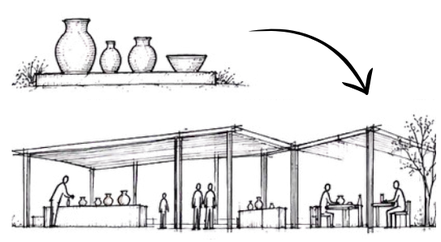
02 [Water] + [Water to soften clay] → Fluid shallow waterbody



03 [**Air**] + [Drying and shaping of pottery] → Upward spiral ramp



04 [**Fire**] + [Kiln to harden clay] → Warm enclosed space



05 [**Space**] + [Display of art] → Exhibition

SAANIDHYA

Melukote's waterbodies and everyday traditions remain neglected, overshadowed by its temples. Saanidhya integrates the revival of a neglected waterbody with a spatial ethnography centre, creating spaces for cultural engagement, recreation, and locally led workshops that sustain livelihoods and reconnect visitors with the town's living heritage.

LOCATION	Melukote, Mandya	AREA	4.43 acres

06 SELECTED EXPLORATIONS

URBAN DESIGN MODEL

Site model of Melukote, presented to the Town Development Authority and now displayed in Melukote.

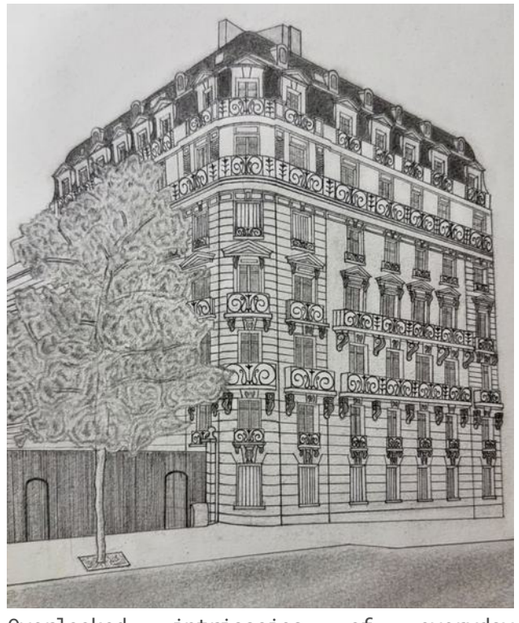
PHYSICAL MODELS

An abstraction of spider web geometry into a residential design exploration.

Tensile exploration of emotions emerging, expanding, & intersecting to form an interconnected whole.

PENCIL SKETCHING

An exploration of emotional numbness, where accumulated trauma continues to spill into other aspects of life, even when we feel nothing more can affect us.

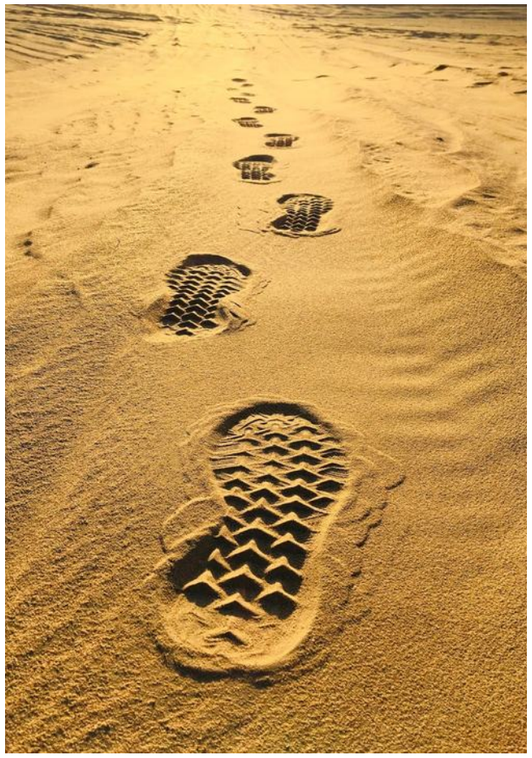


Overlooked intricacies of everyday Parisian architecture, finding beauty beyond the city's celebrated monuments.

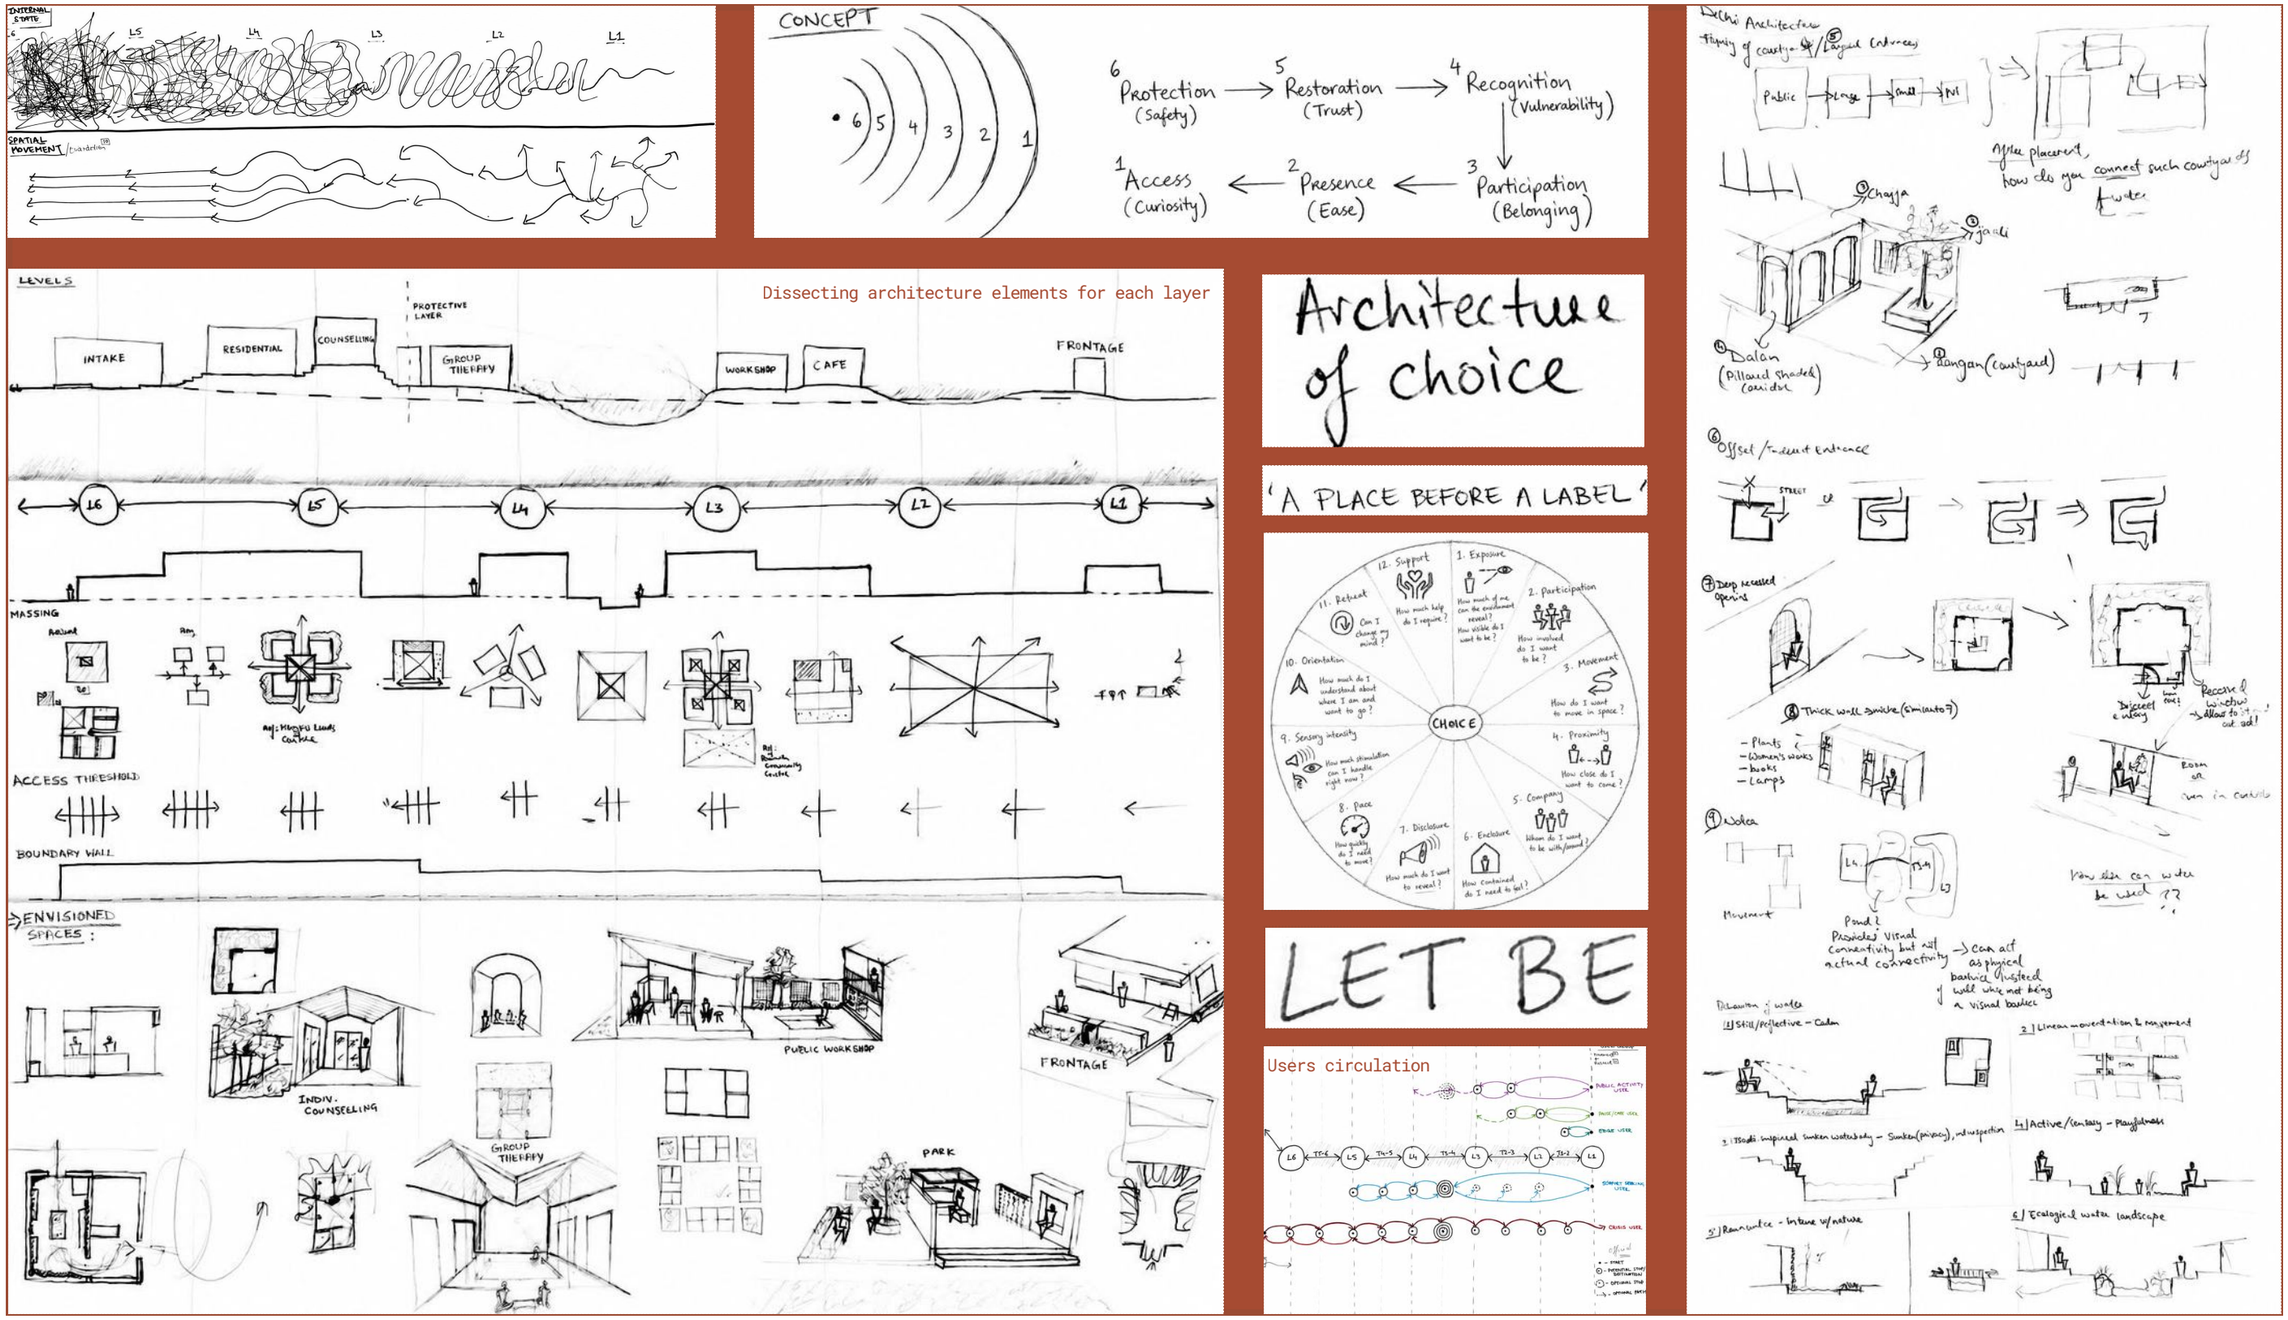
PAINTING

An abstract reflection on school life, illustrating how the people I crossed paths with brought colour, warmth, and light into my life.

PHOTOGRAPHY



RESEARCH & SPATIAL TRANSLATION



Part of my ongoing thesis, *Architecture of Choice*, a six-layer women's centre in Delhi catering to survivors of sexual abuse and violence. The layers progress from everyday public interaction to discreet crisis intervention, individual support, and private recovery, allowing women to choose their degree of visibility, participation, and retreat.
